

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2004/019311

A. CLASSIFICATION OF SUBJECT MATTER
Int.Cl⁷ A61B3/113

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
Int.Cl⁷ A61B3/00-3/18Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
Jitsuyo Shinan Koho 1922-1996 Toroku Jitsuyo Shinan Koho 1994-2005
Kokai Jitsuyo Shinan Koho 1971-2005 Jitsuyo Shinan Toroku Koho 1996-2005

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Y	JP 2739331 B2 (ATR Communication Systems Research), 23 January, 1998 (23.01.98), Fig. 1; Claim 1; column 4, lines 17 to 30 (Family: none)	7-10
Y	JP 11-056782 A (Kabushiki Kaisha Techno Works), 02 March, 1999 (02.03.99), Fig. 1; Par. Nos. [0001], [0011], [0023] (Family: none)	7-10
A	JP 2002-102172 A (National Institute of Advanced Industrial Science and Technology), 09 April, 2002 (09.04.02), Full text; all drawings (Family: none)	6-10

☒ Further documents are listed in the continuation of Box C.☐ See patent family annex.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family

Date of the actual completion of the international search
04 April, 2005 (04.04.05)Date of mailing of the international search report
19 April, 2005 (19.04.05)Name and mailing address of the ISA/
Japanese Patent Office

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2004/019311

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.: 1-5

because they relate to subject matter not required to be searched by this Authority, namely:

Claims 1 to 5 are relevant to diagnostic methods to be practiced on the human body and thus relate to a subject matter which this International Searching Authority is not required, under the provisions of Article 17(2)(a)(i) of the PCT and Rule 39.1(iv) of the Regulations under the PCT, to search.

2. ☐ Claims Nos.:

because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:

because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

There is no construction common to the invention of a sight-line detection device described in claim 6 and the inventions of a three-dimensional view-point measurement device described in claims 7-10.

This means that "a first camera" (10 and 11 in Fig. 1) of claim 6 is a device for measuring the position of a pupil (P) and "a second camera" (12 in Fig. 1) is a device for obtaining data of angle ϕ , while on the other hand, both "a first camera" (101 in Fig. 9) and a second camera" (102 in Fig. 9) are devices for extracting a pupil and cornea reflection. The cameras have the same terms but have different contents.

(continued to extra sheet)

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

☐

The additional search fees were accompanied by the applicant's protest.

☐

No protest accompanied the payment of additional search fees.

Continuation of Box No. III of continuation of first sheet (2)

As a result, there is no technical relationship between the invention of claim 6 and the inventions of claims 7-10 involving one or more of the same or corresponding special technical features.
